Sustainability Through Happiness

In this webinar, Scott Cloutier will briefly outline his applied research program as director of the Sustainability and Happiness Research Lab (Happy Lab). The Happiness Research Lab states that "by integrating happiness science and research, we seek to promote multiple pathways toward a happy, healthy and sustainable world. With open hearts and open minds, we empower communities to create loving relationships within themselves, with each other, the Earth, and all life." Scott will also provide insight into the Happy Hoods Projects, which are meant to simultaneously promote sustainability and opportunities for happiness.

Guest Speaker:

Scott Cloutier is an Assistant Professor and Senior Sustainability Scientist at Arizona State University's School of Sustainability. He is the director of the Sustainability and Happiness Research Lab (Happy Lab) and the Sustainable Neighborhoods for Happiness Projects (Happy Hoods). His research and applied work focus on processes of sustainable community development to maximize opportunities for happiness.

Moderators:

- **Laura Musikanski**, Executive Director the Happiness Alliance (happycounts.org); former ED for Sustainable Seattle, a sustainability director for a national environmental consulting firm, and sustainability consultant for profit and non-profit organizations. Author of "How to Account for Sustainability: a guide to measuring and managing, and Decoding Sustainability".
- **Jill Johnson (MPA)**, Executive Director for ISQOLS
